#### 14 Risk management policies

There have been no material changes since the signing of the 30 June 2012 Disclosure Statement in the Banking Group's policies for managing risk, or material exposures to any new types of risk.

#### 15 Credit risk

Credit risk is the risk of financial loss to the Banking Group caused by the failure of a customer to meet their contractual obligations that arise from the Banking Group's lending activities. Credit risk carries the greatest risk of resulting in a material adjustment to the carrying amounts of the Banking Group's assets within the next financial year.

To manage this risk the Risk Committee, a committee of the Board of Directors (Board), has been delegated the task of overseeing a formal credit risk management strategy. The Risk Committee reviews the Banking Group's credit risk exposures to ensure consistency with the Banking Group's credit policies to manage all aspects of credit risk.

The tables below represent the maximum credit risk exposure, without taking account of any collateral held. The exposures set out below are based on net carrying amounts as reported in the Interim Statement of Financial Position.

#### (d) Credit exposure to individual counterparties

At 31 December 2012 the Banking Group did not have any period end or peak end-of-day credit exposures over 10% of equity to individual counterparties (not being members of groups of closely related counterparties) or groups of closely related counterparties (excluding central government of any country with a long-term credit rating of A- or A3 or above, or its equivalent, or any bank with a long-term credit rating of A- or A3 or above, or its equivalent, and connected persons).

The peak aggregate end-of-day credit exposures is determined by taking the maximum end-of-day aggregate amount of credit exposure over the period. The amount is then divided by the Banking Group's equity as at the end of the quarter. Credit exposures disclosed are based on actual exposures. The credit rating is applicable to an entity's long term senior unsecured obligations payable in New Zealand, in New Zealand dollars.

### (e) Other assets under administration

Other assets under administration are any loans, not being individually impaired or 90 days or more past due, where the customer is in any form of voluntary or involuntary administration, including receivership, liquidation, bankruptcy or statutory management. As at 31 December 2012, the Banking Group did not have any assets under administration.

# Real Estate Credit Limited Management Agreement (RECL Agreement)

On 5 January 2011, MARAC entered into the RECL Agreement with Real Estate Credit Limited (RECL) under which RECL assumed the risk of loss on certain non-core property loans for a 5 year period (ending 5 January 2016). The maximum amount payable by RECL in respect of loss (including interest accruing on loss payments until the due date for payment) is limited to \$30 million and payment is due at the end of the 5 year period (\$2.0 million has been paid to date). The RECL Agreement covers MARAC non-core property loans with a net book value of \$84 million as at 31 December 2012 (December 2011: \$88 million; June 2012: \$94 million).

In determining the charge for the year, the RECL Agreement has been taken into consideration. In assessing the requirements for provisions, the Banking Group has identified loans for which a loss is expected to be covered by the RECL Agreement of \$28.0 million as at 31 December 2012 (December 2011: \$16.6 million; June 2012: \$28.5 million). Claims of \$28.0 million are expected to be made under the RECL Agreement in relation to these loans, and to this extent, the RECL Agreement is fully utilised.

Further information about the RECL Agreement is included in the Bank's Disclosure Statement for the year ended 30 June 2012.

For the six months ended 31 December 2012

# 17 Liquidity risk

Liquidity risk is the risk that the Banking Group may encounter difficulty in raising funds at short notice to meet its commitments and arises from any mismatch of the maturity of financial assets and liabilities. Responsibility for liquidity management is delegated to the Asset and Liability Committee (ALCO), with the Risk Committee providing oversight.

The Banking Group manages liquidity and funding risk by:

- weekly liquidity reporting and scenario analysis to quantify the Banking Group's current and forecast position.
- maintaining a diverse and stable funding base.
- retaining borrowing facilities committed to the Banking Group by registered banks.
- holding a portfolio of liquid assets.
- ensuring the liquidity management framework is compliant with local regulatory requirements.

#### (c) Expected maturity profile of financial assets and liabilities

The following table shows management's expected maturities of existing financial assets and financial liabilities.

Expected maturities of financial assets are based on management's best estimate having regard to current market conditions and past experience. The expected maturities of securitised borrowings are based on the expected maturities of securitised receivables and historical deposit and debenture reinvestment levels have been applied to other borrowings. Other financial liabilities reflect contractual maturities.

The table does not reflect a forward looking view of how the Banking Group expects actual financial assets and liabilities to perform in the future, as it does not include new lending and borrowing.

#### 19 Interest rate risk

Interest rate risk is the risk that market interest rates will change and impact on the Banking Group's financial results by affecting the margin between interest earning assets and interest bearing liabilities. The Banking Group monitors market interest rates on a daily basis and regularly reviews interest rate exposure. Interest rate risk is mitigated by management's frequent monitoring of the interest rate repricing profiles of borrowings and finance receivables, and where appropriate, the establishment of derivative instruments.

#### Contractual repricing analysis

The interest rate risk profile of financial assets and liabilities that follows has been prepared on the basis of maturity or next repricing date, whichever is earlier.

#### 20 Capital adequacy

The Banking Group is subject to regulation by the RBNZ. The RBNZ has set minimum regulatory capital requirements for banks that are consistent with the internationally agreed framework developed by the Basel Committee on Banking Supervision. These requirements define what is acceptable as capital and provide for methods of measuring the risks incurred by the Banking Group.

The Banking Group must comply with RBNZ minimum capital adequacy ratios as determined in its Conditions of Registration which require capital adequacy ratios to be calculated under the Basel II framework in accordance with the Capital Adequacy Framework (Standardised Approach) BS2A. Basel II consists of three pillars. Pillar One covers the capital requirements for credit, operational, and market (including interest rate) risks. Pillar Two covers all other material risks not already included in Pillar One and the requirement for an internal capital adequacy process; and Pillar Three relates to market disclosure.

The capital adequacy tables set out on the following pages summarise the composition of regulatory capital and the capital adequacy ratios for the Banking Group for the six months ended 31 December 2012.

# Internal Capital Adequacy Assessment Process ('ICAAP')

The Banking Group has an ICAAP which complies with the requirements set out in BS12 and is in accordance with its Conditions of Registration. The Board has overall responsibility for ensuring the Banking Group has adequate overall capital in relation to its risk profile and establishes minimum internal capital levels and limits above the regulatory minimum.

The documented process ensures that the Banking Group has sufficient available capital to meet minimum capital requirements, even in stressed events. It describes the risk profile of the Banking Group and the risk appetite and tolerances under which it operates, and assesses the level of capital held against the material risks of the bank (both Pillar One and Pillar Two).

The ICAAP identifies the additional capital required to be held against other material risks, being concentration risk, strategic / business risk, reputational risk, regulatory risk and model risk. See Note 20(i) for further details.

#### Reserves

Available-for-sale reserve	The available-for-sale reserve comprises the changes in the fair value of available-for-sale securities, net of tax. These changes are recognised in profit or loss as other income when the asset is either derecognised or impaired.
Hedging reserve	The hedging reserve comprises the fair value gains and losses associated with the effective portion of designated cash flow hedging instruments.
Defined benefit reserve	The defined benefit plan reserve represents the excess of the fair value of the assets of the defined benefit superannuation plan over the net present value of the defined benefit obligations.

Peak end of day aggregate capital charge at the end of the period is derived by following the risk methodology for measuring capital requirements within Part 10 of the Standardised Approach. Peak end of day aggregate capital charge is derived by determining the maximum end of month capital charge over the reporting period. Based on the portfolio of the Banking Group's risk exposures, it is considered by management that the difference between end of month aggregate capital charge and end of day aggregate capital charge is insignificant.

# (i) Other material risks

The ICAAP has identified the capital required to be held against other material risks (being concentration risk, strategic / business risk, reputational risk, regulatory risk and model risk). The Board has determined that the regulatory minimum capital of 12% as per the Conditions of Registration is sufficient to cover these other material risks. As a result, there is no additional internal capital allocation for other material risks.

# **Review opinion**

We have examined the interim financial statements and supplementary information and based on our review nothing has come to our attention that causes us to believe that:

- a) the interim financial statements on pages 4 to 22 (excluding the supplementary information disclosed in accordance with schedules 5, 7, 9, 13, 16 and 18 of the Order) have not been prepared, in all material respects, in accordance with NZ IAS 34 *Interim Financial Reporting* and do not present a true and fair view of the financial position of the Banking Group as at 31 December 2012 and its financial performance and cash flows for the six month period ended on that date;
- b) the supplementary information (excluding supplementary information relating to capital adequacy) disclosed in accordance with schedules 5, 7, 13, 16 and 18 of the Order, does not fairly state the matters to which it relates in accordance with those schedules; and
- c) the supplementary information relating to capital adequacy disclosed in accordance with schedule 9 of the Order, is not, in all material respects prepared in accordance with the Bank's conditions of registration and disclosed in accordance with schedule 9 of the Order.

Our review was completed on 25 February 2013 and our opinion is expressed as at that date.
